FOR CONGRESS.

In obedience to the requests of Democrats in every part of the Eighth Congressional District, and in accordance with my desire to be of service to the Democratic party and the country, in critical and important times, I amounce myself a candidate for Congress, subject to the action of the Democratic party. As a loyal Democrat. I have always supported the nominess and platforms of the Democratic party and I now support the platform slopted by the last National Democratic Convention, held at Chicago.

I am sincerely grateful for the cordial sup-port given me by the Democrats of the Eighht Congressional District in the past, and I have tried to show my appreciation of their confi-dence and kindness, by unceasing efforts, to be a faithful and efficient Representative.

If honored by the nomination, I believe, can with the aid of my brother Democrats, re deem the district, and in the future as in the past my best efforts shall be given to the faith ful discharge of all duties required of me. JAMES B. MCCREARY.

ARMY and Navy men have for many years been clamoring for the coast and Navy improvements now being hurriedly made. Those posted on such matters have gone be'ore congressional committees for the last twenty years, and, with tears in their eyes, predicted that Uncle Sam would prevent the new democratic commisbe caught with his breeches down, but the national houses, being composed chiefly of burr-tailed backwoodsmen paid no heed, and now that trouble is at hand, every improvement for defense has to be made in the twinkling of an eye and thrown together in any way to get it done. Nearly every man sent to congress puts in his undivided time working for re-election. A law should be passed making them in eligible, and then probably the interests of the country, instead of those of the member, would be looked after.

COL. S. M. BURDETT, correspondent of the Chicago Chronicle, thus sizes up the situation:

The best opinion here all trends in one direction, which is that war is impending. Even if this Government should be satisfied with an indemnity Spain will decline to pay it. President McKinley will not consent to arbitrate the question of Spanish respon sibility if the decision of our naval re port is definite and unanimous. The Board of Inquiry report will probably go to Congress in about one week, ac companie i by a special message from Mr. McKinley. A demand upon Spain for indemnity or a declaration of war against that Government will be made within a few hours after all the facts are laid before Congress

WE haven't much faith in the fight ing abilities of the men-of-war. While they cost millions of dollars and much study is given them, yet what they can do has only been figured out on paper. It one small sub-marine mine can, in finest ships affoat, what other and more power'ul apparatus could do would soon put to the bottom of the s:a every war vessel in both navies. We are of the or inion that the navies of both the United States and Spain amount to not much more than so ma ny washing tubs, that both will be destroyed in a few weeks' fighting, and the old, reliable rifle will have to be called into service to whip the Dons if our men can only get at them.

THE old saw, "A good beginning has a bad ending," proved true with the recent session of the legislature The body started out by proposing some excellent and badly needed legislation, but soon became demoralize and the latter part of the session was spent in passing extreme political measures, fist fights, personal quarre's, and time killing. It seems impossible for a session of the Kentucky legislature to meet, and attend only to bus iness which is of any value to the Com mon wealth. The past few sessions have been perfect burlesques.

THE Madisonville Hustler gives good advice in the following: "Whether or not there will be war, we are not at present able to say. But we would suggest that the farmers go ahead and plant their crops, that the merchants keep trying to sell goods and that oth er business be conducted as in the past, or at least until the guns begin to fire. There is one thing certain, no one can make a living by sitting around talking about what the United ttates is going to do for Spain when

PUBLISHERS of newspapers receive all kinds of offers in payment for advertising space. A recent letter to THE RECORD offers to "cure any friend from the disease of stuttering." Our printers decline to accept this as pay for their work, so the offer has to be declined. But if any inventor will guarantee to cure some of our acquaintances from lying, we will give aim in return the entire front page for a year.

UNCLE SAM should take considerable salt with these intimations of help sent by foreign countries. The same rules among individuals will and do apply to nations and if this country gets into trouble she will have to hoe her own roe single-handed and alone "A friend in need" is a scarce article these days.

Springtime

It is impossible for the system to withstand the demands made upon it just at this season, without the assistance of a good purifying and strengthening tonic. The changes which Nature decrees shall take place each spring are so severe that a breakdown is almost sure to come. It is wise that all possible assistance be given during this period, as upon this purifying process depends the health for the entire summer. Everybody just now should take a thorough course of Swift's Specific

S.S.S.For Blood

which thoroughly cleanses the blood of all the accumulated impurities, tones up and strengthens the entire system, and aids Nature in renovating and renewing the body so as to render it healthy and strong. Those who purify their blood with S. S. S. at this season are well fortified against the many forms of disease so prevalent dur-ing the dreaded heated term, for it has been demonstrated that the system that is thoroughly purified in the spring is well prepared to resist disease all summer.

No other remedy on the market is equal to Swift's Specific as a spring medicine, because it is the only purely vegetable blood remedy and is guaranteed absolutely free from potash, mercury and all other minerals. It cleanses, purifies, builds up and strengthens. Insist on S. S. S., for there is nothing half as good.
